

GAJELABS - SCD WIDGET

SCD comes with an optional end users widgets that you can include on your store pages to allow your customers to manually select the currency in which they want to view the product prices. The use of the SCD widget is optional and it allows several ways of activation. The five mains ways that you can enable SCD Widget on your store are the following:

1. Enable Drag/Drop SCD mobile widget

On the WordPress admin dashboard go to **Woocommerce > SCD currencies > currencies settings > enable mobile currency conversion widget**. And then save changes, as illustrated bellow.

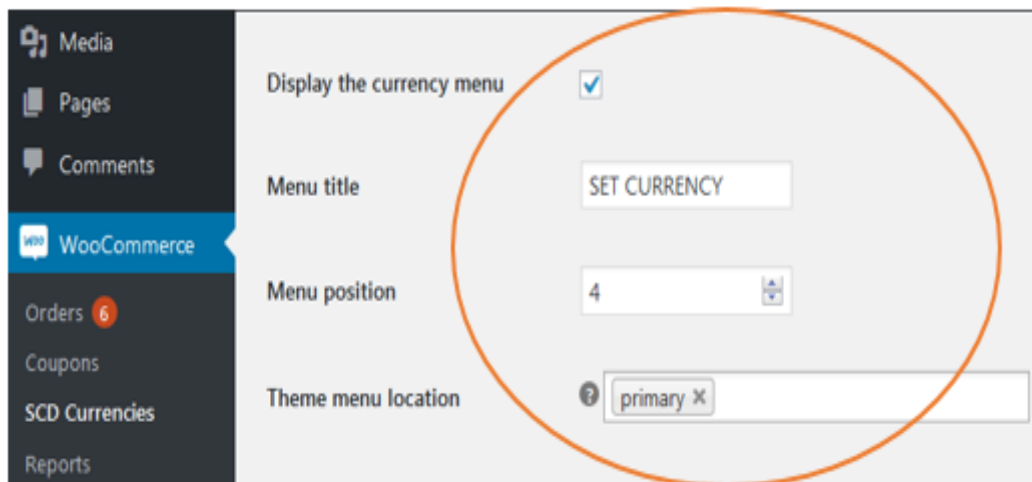

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

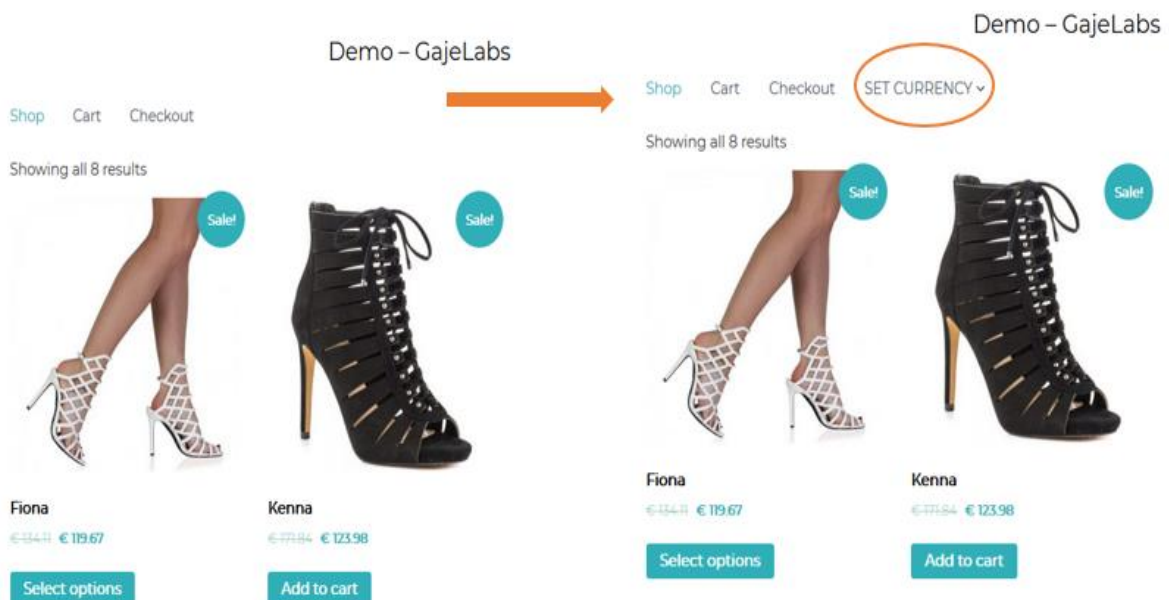

You have a possibility to drag and drop the SCD widget and place it where you need.

2. Enable SCD Dropdown menu of currencies list

On the WordPress admin dashboard go to **Woocommerce** > **SCD currencies** > **currencies settings**. Make your changes as illustrate on the bellow picture. Save changes.

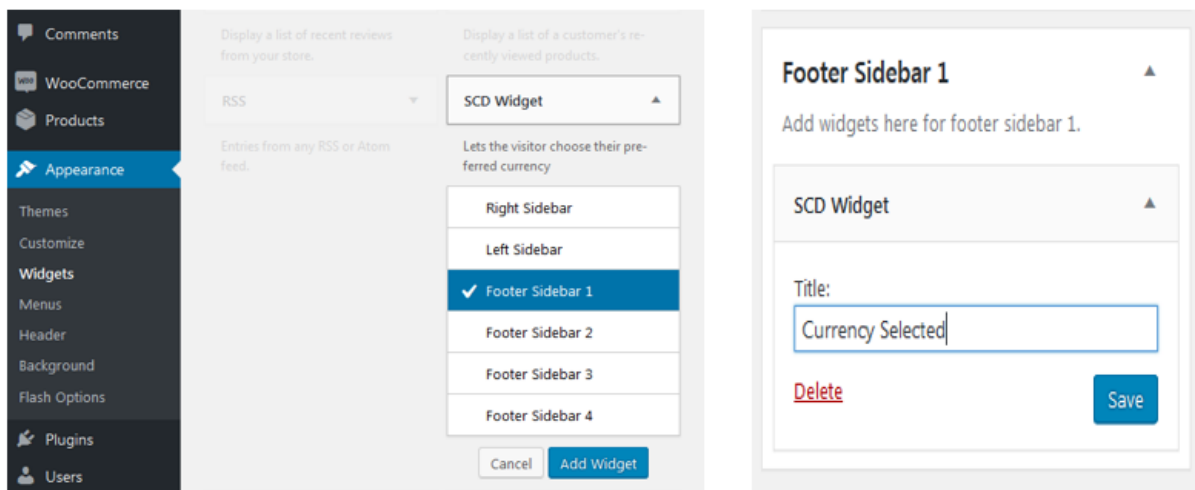

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

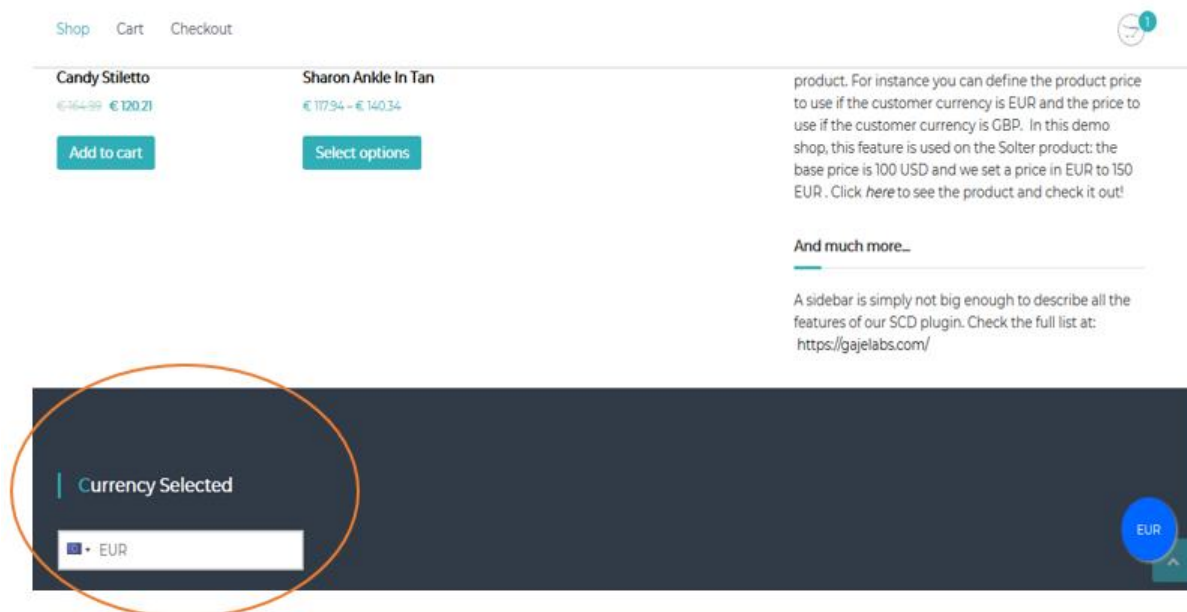

3. Enable SCD Widget by using widget menu on WordPress

On the WordPress admin dashboard go to **appearance** > **widget** > **SCD widget**. According to your WordPress theme, select the place on the web page where you want to display it, as illustrated bellow.

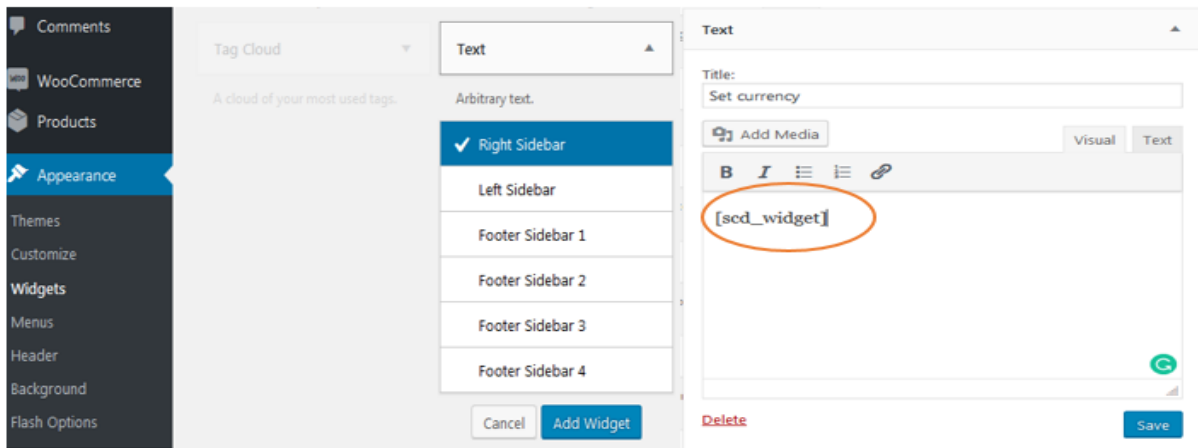

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

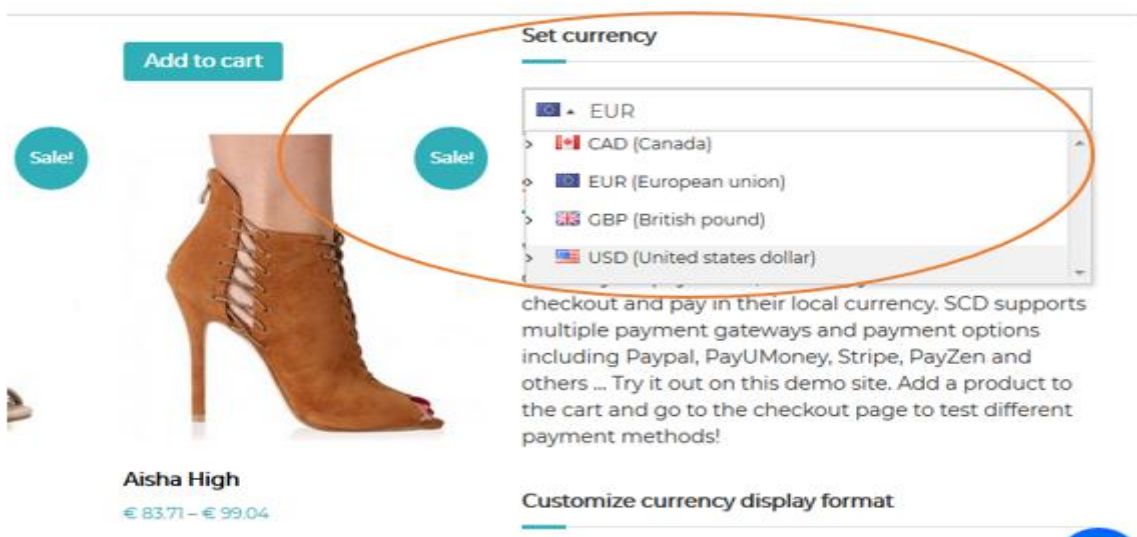

4. Enable SCD Widget by using a shortcode on WordPress Text widget (first way)

The SCD widget shortcode is `[scd_widget]`.

On the WordPress admin dashboard go to *appearance > widget*. Then add a **Text widget** on your web page and set the text to `[scd_widget]`, as illustrated bellow.

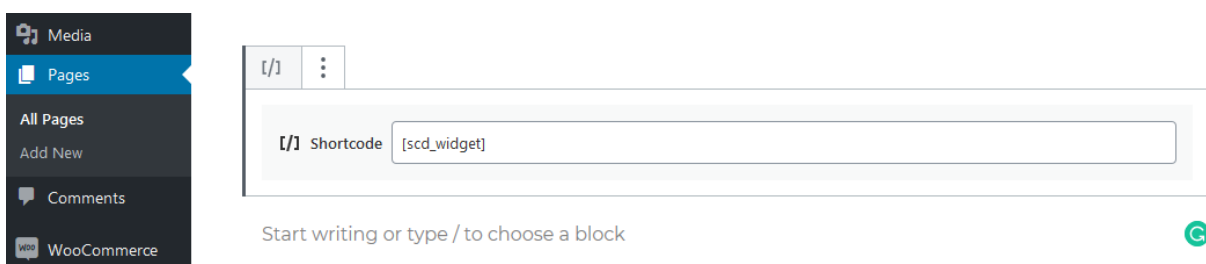

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

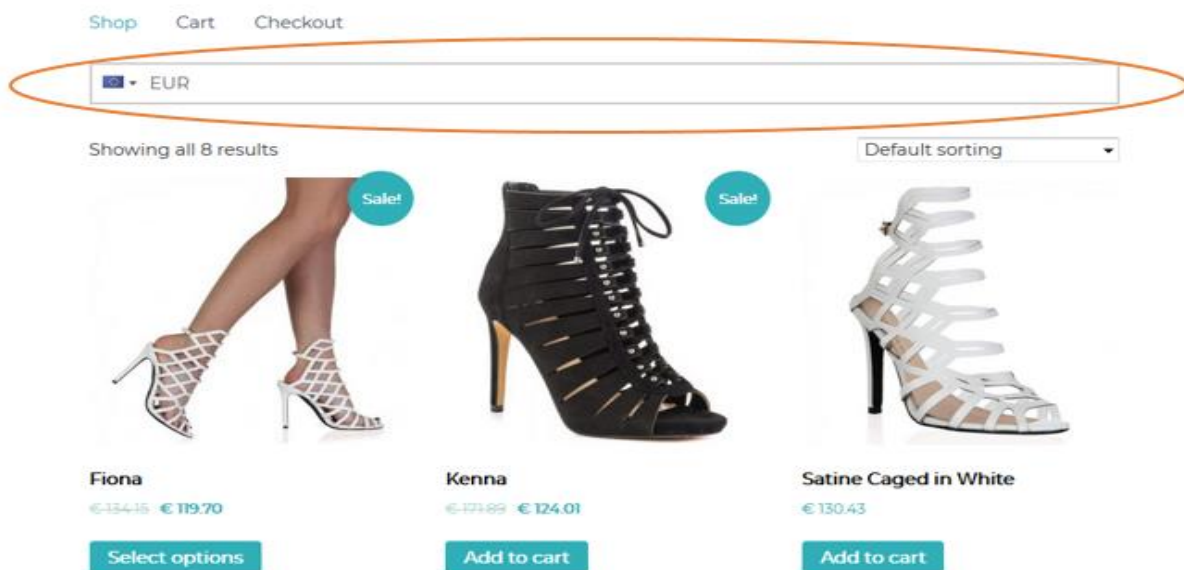

5. Enable SCD Widget by using a shortcode directly on web page (second way)

The SCD widget shortcode is `[scd_widget]`.

You can use WordPress web page editor and add shortcode `[scd_widget]` in block space anywhere you like as shown below.

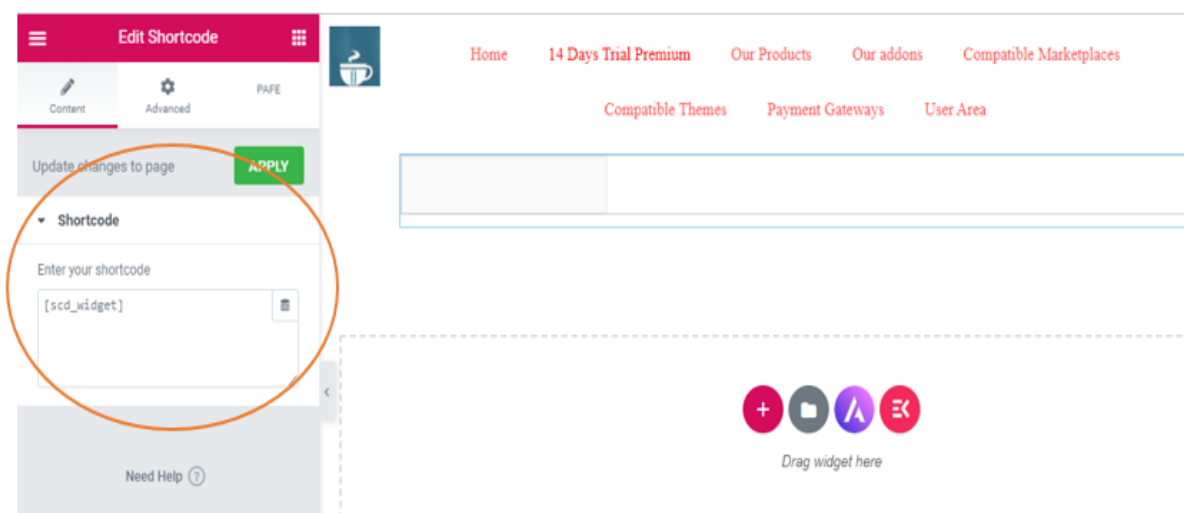

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

6. Enable SCD Widget by using a shortcode on Elementor plugin (third way)

The SCD widget shortcode is `[scd_widget]`.

If you are used the **Elementor plugin** to build your web page, you can also add the shortcode `[scd_widget]` where you want by using drag/drop shortcode block on Elementor, as illustrated bellow.

After doing this setup, when you go to your store, you will have a preview similar to the following picture.

EUR

Welcome To SCD

Setting the list of currencies available in the SCD widget

The list of currencies available in the SCD widget is determined by the admin setting “**Filter currencies enabled for your store**” located in the Currencies Settings tab of the SCD settings menu:

- When the setting is set to “All” : all possible currencies can be selected using the SCD widget
- When the setting is set to a fixed list of currencies: only the currencies in the specified list can be selected using the SCD widget

(All currencies enabled)
