

GAJELABS - SCD GATEWAYS

SCD is compatible with a several payment gateways and allow a wide variety of payment methods. From the main means of payment like visa, mastercard, stripe or even paypal to the means of payment diffused in countries outside of the western world, such as payumoney, square, American Express. We also accept new generation means of payment such as bitcoin, google pay, apple pay, Alipay, PayZen, or CardCom.

1. Enable multiple currencies payment

On the WordPress admin dashboard go to **Woocommerce > SCD currencies > General settings > Enable multiple currencies payment**. And then save changes, as illustrated bellow.

Setting	Description
<i>Enable multiple currencies payment</i>	<p>This setting enables or disables the use of multiple currencies for checkout and payments.</p> <p>When this setting is enabled: Checkout and payment will be made in the selected currency using the converted product prices, for supported payment gateways.</p> <p>When this setting is disabled: SCD will convert the product prices displayed on the shop and product pages; however, all payments will be made in the <i>base currency</i> using the unconverted product prices.</p> <p>Note: <i>base currency</i> refers to the shop currency set in the WooCommerce setting</p>

After doing this setup, when you have been set up a payment gateway like paypal on your store for example, the payment will be made in the local currency of the customer if it is supported by paypal. On the bellow pictures you have a preview.
